EDUCATION

2025 – 2029
B.Tech — CSE
VIT Bhopal University

2024 – 2025
Class XII — 84.4%
D.A.V Public School

2022 – 2023
Class X — 89.4%
D.A.V Public School

TECHNICAL SKILLS

LANGUAGES

English — Fluent

Hindi — Native

SOFT SKILLS

- Problem Solving
- UI/UX Thinking
- Team Collaboration
- Continuous Learning
- Time Management
- Critical Thinking

PROFILE

Computer Science Engineering student passionate about frontend development and user experience design. Proficient in building full-stack web applications using React, Node.js, and Python. Experienced in developing and deploying AI-integrated projects, responsive dashboards, and productivity tools.

PROJECTS

AI Resume Analyzer

github.com/RoNnY125-coder/AI-Resume-Analyzer

Python · FastAPI · scikit-learn · TF-IDF · HTML/CSS/JS · Vercel

- Built an end-to-end AI/ML tool that parses PDF resumes and scores them across 6 dimensions — keyword match, section structure, impact metrics, skills depth, formatting, and action verbs — using TF-IDF cosine similarity.
- Engineered a FastAPI backend with pdfplumber for text extraction; delivers score (0–100) with letter grade and actionable feedback in under 3 seconds. Deployed live on Vercel.

Campus Mind — AI Campus Assistant

github.com/RoNnY125-coder

React · Node.js · LLM APIs · REST API · JavaScript

- Developed an AI-powered assistant to answer student queries about schedules, campus resources, and academic information via LLM API integration.
- Designed and implemented a clean conversational React chat UI with context-aware responses and a smooth, accessible user experience.

E-Commerce Admin Dashboard

github.com/RoNnY125-coder/E-commerce-Dashboard

React · TypeScript · Tailwind CSS · Chart.js · Supabase

- Built a fully responsive admin dashboard featuring real-time analytics, inventory management, and order tracking powered by Supabase.
- Implemented dynamic Chart.js visualizations and a dark/light mode toggle; used TypeScript throughout for type safety and scalability.

Task Management App

github.com/RoNnY125-coder/Task-Management-App

React · TypeScript · Tailwind CSS · Context API

- Created a collaborative task manager with drag-and-drop Kanban boards, multiple task views (list, board, calendar), and dark/light mode support.
- Applied advanced React patterns — custom hooks, Context API, and TypeScript interfaces — for a clean, maintainable, and scalable codebase.

TOOLS & TECHNOLOGIES

React.js · Node.js · Express · MongoDB · Python · FastAPI · TypeScript · Tailwind CSS · Figma · Git · GitHub · Vercel · Supabase · Chart.js · REST APIs · HTML5 · CSS3 · JavaScript
